TECHNICAL SPECIFICATIONS

Between the 14th November and the 29th November 2019, Kantar on behalf of Kantar Belgium carried out the wave 92.3 of the Eurobarometer survey, on request of the European Commission, Directorate-General for Communication, "Media monitoring and Eurobarometer" Unit.

The wave 92.3 includes the Standard Eurobarometer 92 and covers the population of the respective nationalities of the European Union Member States, resident in each of the 28 Member States and aged 15 years and over.

The Standard Eurobarometer 92 survey has also been conducted in the five candidate countries (Turkey, North Macedonia, Montenegro, Serbia and Albania) and in the Turkish Cypriot Community. In these countries and in the Turkish Cypriot Community, the survey covers the national population of citizens and the population of citizens of all the European Union Member States that are residents in these countries and territories and have a sufficient command of the national languages to answer the questionnaire.

** On 26 November, North-western Albania was struck by a strong 6.4-magnitude earthquake, in which 51 people lost their lives. A large part of the country remained inaccessible and in emergency for a significant period after the disaster. Therefore, fieldwork had to be stopped until 3 December.

The basic sample design applied in all States is a multi-stage, random (probability) one. In each country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

In order to do so, the sampling points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the countries surveyed according to the EUROSTAT NUTS II (or equivalent) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas.

In each of the selected sampling points, a starting address was drawn, at random. Further addresses (every Nth address) were selected by standard "random route" procedures, from the initial address. In each household, the respondent was drawn, at random (following the "closest birthday rule"). If no one answered the interviewer in a household, or if the respondent selected was not available (not present or busy), the interviewer revisited the same household up to three additional times (four contact attempts in total). Interviewers never indicate that the survey is conducted on behalf of the European Commission beforehand; they may give this information once the survey is completed, upon request.

The recruitment phase was slightly different in the Netherlands and Sweden. In these countries, samples of addresses were selected using address or population registers, within each sampling point: the selection of households was done in a random manner. Households were then contacted by telephone (Netherlands and Sweden) and e-mail (Sweden) and an appointment was made.

All interviews were conducted face-to-face in people's homes and in the appropriate national language. As far as the data capture is concerned, CAPI (*Computer Assisted Personal Interview*) was used in those countries where this technique was available.

For each country a comparison between the responding sample and the universe is carried out. Weights are used to match the responding sample to the universe on gender by age, region and degree of urbanisation. For European estimates (i.e. EU average), an adjustment is made to the individual country weights, weighting them up or down to reflect their 15+ population as a proportion of the EU 15+ population.

The response rates are calculated by dividing the total number of complete interviews with the number of all the addresses visited, apart from ones that are not eligible but including those where eligibility is unknown.

For Standard Eurobarometer 92, the response rates for the EU28 countries, calculated by Kantar, are:

BE	46,4%	EL	28,9%	LT	46,9%	PT	40,2%
BG	44,6%	ES	35,7%	LU	20,1%	RO	63,4%
CZ	45,2%	FR	30,2%	HU	61,3%	SI	48,3%
DK	35,5%	HR	57,1%	MT	52,6%	SK	72,5%
DE	19,0%	IT	25,8%	NL	78,0%	FI	17,6%
EE	40,9%	CY	43,4%	AT	47,6%	SE	60,8%
IE	53,5%	LV	42,1%	PL	44,4%	UK	34,7%

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits:

<u>Statistical Margins due to the sampling process</u> (at the 95% level of confidence)										
	various sample sizes are in rows					various observed results are in columns
